

SYNTHETIC TRAINING FIXTURE - NOT A REAL STANDARD OR CERTIFICATION RECORD

SYN-EMC-LAB-101 Conducted Pre-scan Teaching Card

[syn-pdf-text-01-sec-01] On synthetic bench C1, wait 60 seconds for LISN stabilization before logging.

[syn-pdf-text-01-sec-02] The teaching sweep band is 150 kHz to 30 MHz.

[syn-pdf-text-01-sec-03] Run a peak-detector scan first, then perform a quasi-peak recheck.

[syn-pdf-text-01-sec-04] Store one cable-layout photograph with every synthetic pre-scan record.
